Want More Wild Ducks Next Fall?

Wild Ducks go and stay longer where they find the BEST feeding grounds—a variety and abundance of their natural foods. They pass up places where there is no food, or just stop for a drink and then fly on, seeking out the beds of Giant Wild Rice, Duck Potato, Wild Celery, Horned Pond Plant, Bur Reed, Water Cress, Elodea, Duck Meats, etc.

Fortunately, where such foods are not now growing, they can be planted very easily, and these hardy foods will grow year after year when once established, making PERMANENT, LEGAL, natural feeding grounds.

We supply both Northern and Southern grown plants; duck foods for fresh hard and soft waters, salt, brackish, and alkaline waters; a complete line, something for all conditions.

NOW is an ideal time to plan and plant your feeding grounds for wild ducks. We have helped many sportsmen, hunting clubs and game commissions throughout the U. S. and Canada, make their places favorite stopping and feeding grounds for wild ducks. Areas that a few years ago were worthless waste places, now planted with our natural wild duck foods, are now attracting thousands of ducks, that swarm in to feed on the ripened grains and seeds, tender roots, tubers and shoots, as well as the crisp foilage of these natural food plants—foods successfully used for over 50 years.

On the following pages we list the favorite natural foods of wild ducks, wild geese, food and shelter for fish, and other wild life. Let us know what you want, using handy order blank enclosed, and we'll send materials and planting directions.

Plant These Foods Now to

KNICKELBEIN'S WILD

P. O. BOX 711

For Moist Shores, Marshes to 1 Foot of Water

GIANT BUR REED (*Sparganium eurycarpum*)

Excellent food and cover for Mallards, Black Ducks, Pintail, Teal, Bluebills, Wood Ducks. Grows throughout U. S. in marshy, muddy locations—to 1 ft. water. Holds banks, dams. Stands drought. SEED—10 lbs. (plants 1 acre) \$8.50; 2 lbs., \$3. ROOTS, plant 1200 per acre—1000, \$25; 300, \$10; 100, \$3.50.

WAPATO DUCK POTATO (*Sagittaria latifolia*)

Wild ducks of all kinds, and Canada Geese feed eagerly on the seeds and tender tubers or "potatoes" this plant produces in abundance. Makes food over long season, until the freezeup. Wapato grows in marshy places, to 1 ft. water (sometimes deeper), throughout U. S. and Canada. Plant 1200 tubers per acre. TUBERS or young plants, 1000, \$15; 300, \$6; 100, \$2.75.

THREE-SQUARE BULRUSH (*Scripus americanus*)

Produces an abundance of seeds important as food for many wild ducks and geese. Grows in sandy soils along lake shores, streams or marshes. Prefers less than 2 ft. water — fresh, brackish, moderately alkaline. ROOTS, 1200 plants 1 acre. 1000, \$30; 100, \$5.00.

SMARTWEEDS (*Polygonum*)

Excellent foods for wild ducks, especially attractive to Pintails, Mallards, Teal, Lesser Scaup, Ring-neck ducks; also an attractive natural food for Wild Turkeys, Doves, Pheasants, Grouse, Partridge, Quail. Adapted to a wide range of conditions throughout the U. S. and Canada. Withstands floods and drought. For marshy muddy places, shores, mud flats and shallow fresh, hard or soft water—mildly alkaline and brackish water.

MARSH SMARTWEED (*P. Muhlenbergii*)

For planting on marshy soil, shores, shallow fresh or mildly alkaline water. Withstands Flooding and drought well. ROOTS, plant 1500 per acre. 1000, \$25; 300, \$9; 100, \$3.50.

NODDING SMARTWEED

Grows in moist rich soil, on exposed flats, and in shallow fresh or slightly alkaline marshes. SEED—40 lbs. (sows 1 acre) \$28; 10 lbs., \$7.50; 2 lbs., \$2.25.

WATER SMARTWEED (*Polygonum* sp.)

For planting on muddy shores, and in up to 3 ft. fresh, moderately acid, or mildly alkaline water. Plant 1500 roots or plants per acre. 1000, \$25; 300, \$9; 100, \$4.00.

SWAMP SMARTWEED (*P. hydropiperoides*)

Grows on moist margins, marshes and in shallow fresh or moderately acid (soft) water, preferably not over 6 or 8 inches deep. Withstands shade. Plant 1500 roots or plants per acre. 1000, \$25; 300, \$9; 100, \$4.00.

SOUTHERN-GROWN SMARTWEED

Plant in shallow water, muddy or sandy bottom, using 5 bu. per acre. \$4 per bu.; 5 bu., \$15.00.

WAMPEE (DUCK CORN) (*Peltandra virginica*)

Excellent duck food — especially attractive to Wood Ducks and other marsh ducks. Grows in swampy lands and to 1 ft. soft (acid) or slightly brackish water throughout E. U. S., E. Missouri, Okla., La., E. Texas. Will grow in soft or acid water. Withstands shade. PURE SEED, plant 10 lbs. per acre. 10 lbs., \$6; \$1.00 per lb.

PLANTS, set 1½ to 2 ft. apart. 1000, \$38; 300, \$12; 100, \$5.00.

WILD REED (Canes) (*Phragmites*)

Excellent blinds, cover for wild ducks. Grows 4 to 7 ft. high, on lowlands, and to 2 ft. water. Plant 1200 roots per acre. 1000, \$28; 300, \$10; 100, \$4.00.

SALT MARSH BULRUSH

For salt marshes, low areas where water is brackish—stands salt water tides. SEED, sow 10 lbs. per acre. 2 lbs., \$3; 10 lbs., \$6. ROOTS, (plant 1200 per acre) 1000, \$35; 300, \$12; 100, \$5.

REED CANARY GRASS (*Phalaris*)

Sow on banks, shores, moist lands, or well-drained land, or in few inches water. Grows in up to 2 ft. water. Perennial. Excellent food for Muskrats; cover for wild ducks. Excellent food and shelter for fish. Soil-binder—retards erosion and washing of shores, banks, dams. SEED, 6 lbs. sows 1 acre. 6 lbs., \$6.

Attract Ducks Next Fall !

OLD LIFE NURSERIES

OSHKOSH, WISCONSIN

SPIKERUSH (*Eleocharis palustris*)

Grows 1 to 2 ft. high, in marshy, muddy places, mud or sand bottom, few inches water. Wild ducks and geese feed on it. Plant 1200 clumps per acre. PLANTS—clumps, 1000, \$28; 300, \$11; 100, \$4.00.

RICE CUTGRASS (*Leeria oryzoides*)

Top-notch duck food for areas subject to floods and drought. Mallards, Pintails, Teal and other ducks feed eagerly on seeds (grains) and root-stocks. Grows about 2 ft. high on rich, moist soil in bottom lands of rivers, marshes, swamps. May-June delivery. PLANTS, clumps 1000, \$35; 300, \$12; 100, \$5.00.

BUTTON BUSH (*Celphalanthus occidentalis*)

Excellent food for Mallards and upland game birds. Plant along edges of ponds, streams, marshes. ROOTS, 100, \$16; 10, \$3.50.

SPARTINA (Cord Grass)

Fine cover and blinds, also providing some food for ducks. Plant 1500 roots per acre, in marshy meadows, salt marshes, along dikes, bank. Good cover for Pheasants. ROOTS, 1000, \$30; 300, \$11; 100, \$4.00.

FALSE BITTERSWEET (*Solanum dulcamara*)

Excellent food for wild ducks, pheasant, woodcock, snipe. Grows on moist or dry soil, stream banks, swales, bogs, watersides. Ornamental—attractive purple flowers, red berries. ROOTS, 100, \$15; 25, \$5.; 10, \$3.00.

MARSH MALLOW (*Hibiscus*)

Its seeds eagerly eaten by Mallards, Pintails and other ducks. Withstands floods, carp. Plant 2 to 4 ft. apart in moist soil, shallow water, uplands having moisture. ROOTS, 100, \$8; 10, \$2.00.

WATER CRESS

Excellent food for wild duck, and for you too (in salads or sandwiches). Ducks hang around streams where Water Cress grows (remains green all winter where waters do not freeze over) feeding on Water Cress, when other feeding grounds are frozen over. PLANTS, \$5 per bu.; 5 bu. (plants 1 acre) \$15.00.

Giant Wild Rice Brings in the Ducks!

One of the most famous and best known of the natural foods for wild ducks is the Wild Rice.

Mallards, Pintails, Black Ducks, Teal, Wild Canada Geese and other waterfowl fly hundreds of miles to beds of Wild Rice, where they feast eagerly on the ripened grain. Excellent cover.

Giant Wild Rice grows in a few inches to 2½

ft. fresh water, with sufficient change to prevent stagnancy, on mud or muck bottom. Do not plant it south of the Mason-Dixon line.

Large, fully-ripened seed of high germination. \$24 per bu. (sows 1 acre); \$6.50 per pk.; small lots 95c per lb. Young plants, (plant 1500 per acre), 1000, \$15; 300, \$6; 100, \$2.50.

Grown From "Wildlife" Giant Wild Rice Seed

Giant Wild Rice
Flower, Leaf and Seed Head

Sprouted Seeds
Showing High Germination

Plant in 1 to 3 Feet of Water

GIANT WILD RICE—See bottom page 2

PICKEREL PLANT (*Pontederia cordata*)

Attractive plant with spikes of purple flowers. Wild ducks feed on seeds. Plant in 1 to 3 ft. fresh hard or soft water, quiet bays, ponds, streams, marshes, preferably on soft bottom. Use 750 roots per acre. **ROOTS**, 100, \$12.50; 25, \$4.00.

DEEP WATER DUCK POTATO

(*Sagittaria rigida*)

The tubers this plant produces in abundance are favorite food of Bluebills and other diving ducks. Grows in 1 to 3 ft. water, on soft mud bottom, slow-flowing streams, ponds, lakes, marshes. **TUBERS**, (plant 1200 per acre). 1000, \$30; 300, \$11; 100, \$4.00.*

HORNED POND PLANT

(*Zannichellia palustris*)

A great duck food wherever planted throughout the U. S. and Canada. Adapted to wide range of conditions. Grows in ponds, lakes, streams, springs in 1 to 3 ft. fresh, brackish, salt, alkaline waters. Does best on mud bottom, but has grown on sandy soil. Persists in spite of carp. Plant 10 bu. per acre. **PLANTS**, bu. \$5; 5 bu., \$19; 10 bu., \$36. Furnished year-around.

TUBEROUS WHITE WATER LILY

Bluebills, Teal and 17 other species wild ducks feed on the seeds produced. Plant 750 tubers per acre, in 1 to 3 ft. water, preferably soft mud bottom. **TUBERS**, 100, \$7.50; 300, \$12; 750, \$20.*

BANANA WATERLILY (*C. mexicana*)

Important duck food to plant throughout South, including California. Ducks eat roots, tubers, seed. Plant 750 roots or plants per acre in 1 to 2 ft. fresh or slightly salt water, on rich bottom. **ROOTS**, 1000, \$75; 300, \$35; 100, \$15.00.

GREAT BULRUSH (*Scirpus acutus*)

Seeds are excellent food for ducks. Stands wave action; protects dams, banks, eroding shores; checks silt movement. Grows 5 to 7 ft. high; making excellent blinds; cover for waterfowl. Plant 1000 roots per acre in 6 inches to 4 ft. water. **ROOTS**, 1000, \$28; 300, \$11; 100, \$4.00.

DUCK MEATS

Quick-growing — reproduce rapidly and withstand a lot of feeding by a lot of ducks. Make food soon as sown in water—grow year after year. Do not root in soil, but float in water over any kind of bottom. Scatter among reeds, rushes, or flooded brush.

Submerged (Star) Duck Meat. Scatter 12 bu. per A., in fresh hard, or moderately soft (acid) waters. Bu., \$4; 12 bu., \$30; 25 bu., \$50.

Big Ducks Meat—Excellent to sow throughout U. S. and Canada. Floats on top water. Bu., \$4; 6 bu. (sows 1 acre), \$15.00.

Plant in 1½ to 6 or 8 Feet of Water

WILD CELERY (*Vallisneria spiralis*)

The best way to attract more Canvasbacks, Redheads, Bluebills and other diving ducks, is to establish good beds of Wild Celery—they love to feed on the tender roots, shoots, and leaves. Excellent for fish. Easy to grow throughout U. S. and Canada in 1 to 6 ft. hard fresh or slightly brackish, fairly clear water, on sand or coarse silt, fertile bottom—needs change of water—stands some waves and current. Plant 1200 roots per A. **ROOTS**, 1000, \$15; 300, \$6; 100, \$2.75.*

SAGO POND PLANT

(*Potamogeton pectinatus*)

One of the best all-round duck foods in North America. Canvasbacks, Redheads, Mallards, Pintails, Black Ducks, Wild Geese, Swan, and many other waterfowl eagerly feed on the seeds, tender tubers, and all parts of plant. Food and shelter for fish.

Plant throughout the U. S. and Canada in hard fresh, brackish or alkaline water, 1½ to 8 ft. deep, on sandy or mud soil. Stands considerable current and wave action. Carp-resistant. Plant 1200 tubers per acre. **TUBERS**, 1000, \$25; 100, \$5.*

LONGLEAF POND PLANT (*P. americanus*)

Excellent food for ducks, food and shelter for fish. Grows in 2 to 5 ft. water. Stands floods and drought. **PLANTS**, bu. \$5; 3 bu., \$12; 5 bu. (plants 1 acre), \$19.00.

BASSWEED-REDHEAD GRASS

(*P. richardsonii*)

Wild ducks feed on its seeds, rootstocks, and other vegetative portions of plants. Grows in fresh, brackish, alkaline lakes, ponds, streams, on mud or sandy soils. Excellent food for marsh and diving ducks, makes food and shelter for bass and other game fishes. **ROOTS**, plant 1200 per acre. 1000, \$22; 300, \$10. 100, \$4.*

WIDGEON GRASS (*Ruppia*)

Excellent wild duck food for brackish and alkaline waters. Grows submerged. Plant in 1 to 6 ft. water, preferably on soft bottom. 6 bu. plants 1 A. **PLANTS**, bu., \$10; 10 bu. or more \$8 bu.

WATER SHIELD (*Brasenia schreberi*)

Attracts Mallards, Black Ducks, Pintails and many other varieties of ducks. Valuable fish food and cover. Grows in 1 to 5 ft. acid or neutral waters. **ROOTS** or **PLANTS**, 1000, \$28; 300, \$12; 100, \$5.*

MUSKGRASS

All parts of the plant eaten by many kinds of ducks. Grows submerged throughout U. S. and Canada, in hard fresh, brackish or alkaline water a few inches to 30 ft. deep (depending on clarity of water). Excellent for fish—low-growing, does not interfere with fishing. **PLANTS**, bu., \$5; 5 bu. (sows 1 A.), \$20.

* Roots and Tubers weighted, ready to drop into the water, @ \$4 per 1000 additional.

ELODEA (Carp-resisting)

Quick-growing duck and fish food. Ducks eat seeds (small fruits) and leaves. Our guaranteed fresh plants produce vigorous growth. Plant in 1 to 8 ft. water, on mud, loam bottom. \$4 per bu.; 12 bu. (plant 1 A.), \$35.

COONTAIL

Quick-growing, submerged floating duck and fish food. Excellent shelter for game fish, harbors the aquatic insects and animal life fish eat. Ducks eat seeds and foilage. Scatter in shady or sunny places throughout U. S. and Canada, in rather quiet, sheltered spots, over any kind of bottom. \$4 bu.; 12 bu. (sows 1 A.), \$30.

**NAIAS or BUSHY
PONDWEED**
(*Naias flexilis*)

This is a combination duck and fish food plant that will grow almost anywhere in the U. S. and Canada in fresh or brackish waters. It will attract and hold the Teal, Mallards and Pintails besides many other varieties of ducks that feed on the tiny seeds produced by these plants. Makes food and shelter for fish. Low-growing. Does not interfere with fishing. We furnish these plants covered with well ripened seeds in the Fall only. Order early to avoid disappointment. \$4 per bu.; 5 bu. (plants 1 acre) \$3 per bu.

Naias Plant

WEeping Willow — Ornamental; keeps trout waters shaded and cool; harbors insect life that fish, frogs, woodcock, snipe feed on. Quick-growing. Plant along edges of fish ponds, streams. 2 to 4 ft. TREES, \$1 ea.; 10, \$4; 25, \$7.50.

WILLOW CUTTINGS — Easily planted—just shove down into soil. 100, \$4; 300, \$10.00.

WILD RICE FOR TABLE USE !

Fancy Parched Wild Rice for Table Use. 1 lb. makes 15 generous servings. POSTPAID, \$1.75 per lb. Recipes in each package.

IMPROVE YOUR FISHING

When stocking your waters with game fish, be SURE to establish plenty of natural food and shelter for them, afforded by the aquatic plants listed in the foregoing pages. These plants support and encourage production of the small aquatic insect and animal life game fish feed on. The shelter afforded by these plants is vitally important to baby fish, insuring many more of them reaching maturity.

HARDY MUSKRAT FOODS

A good Muskrat Marsh is one of the most profitable pieces of real estate you can own. The numbers of Muskrats one can maintain on any given area depends on the supply of natural food, for Muskrats will not increase beyond the available food supply. You can keep Muskrats on your own marsh, and attract them from adjoining areas,—also stimulate an increase in your Muskrat population, by establishing an **abundance** and **variety** of these foods that Muskrats love and need. Fortunately these plants are easily grown, are hardy and will grow year after year, quickly spread out and become abundant.

FOR SHALLOW WATER UP TO 1 Ft. DEEP

Sweet Flag, Cattail, Wapato (Muskrat Potato).
Bur Reed. (See page 1) .

FOR WATERS 6 In. to 3 Ft. DEEP

Wild Rice. (See page 2).

FOR WATER 2 Ft. to 5 Ft. DEEP

Water Lilies, Great Bulrush, Muskgrass, Elodea, Coontail, Ducks Meats. (See page 3).

The additional fur that can be taken will pay you many times over for the plantings materials needed.

Sweet Flag and Cattail roots, 1000, \$30; 300, \$11; 100 \$4.00. Prices and information on other materials inside pages.

Guarantee

Most seedsmen make no guarantee of their seeds. However, since we specialize in Grade A1 seeds of the highest germination, we are confident that if planted in suitable conditions, they will produce excellent growth. We therefore make the following liberal guarantee:

If any of our planting materials fails to produce satisfactory growth, after giving planting sufficient time to establish itself, we **GUARANTEE** to replace it at half price, or furnish an equal value, at half price of any other planting materials selected from our current list.

Wild Life Foods

Many sportsmen are establishing their own private shooting areas for pheasants, quail and other game. However, the finest cover in the country will not hold the birds that are stocked on these areas unless there is also an abundance of food. We have specialized in supplying **only** the very finest, **proven** favorite foods of game and all our materials are covered with our regular **GUARANTEE** to produce what you consider a very satisfactory growth, so why experiment? Our natural foods will keep the game on your place from wandering off to supply sport for someone else at your expense and these same foods will serve to attract game from miles around and hold them on your place to insure you the very best of sport. You have an investment in equipment and in your place, so why not realize the most from it by insuring plenty of birds by planting their favorite foods to hold and attract them?

ATTRACT and HOLD WILD DUCKS, PHEASANTS, WILD TURKEYS and OTHER GAME WITH THESE FINEST, SELECTED FAVORITE FOODS.

TARTARY BUCKWHEAT is one of the best pheasant grains known. It also provides an abundance of food and cover for quail and other upland game. Because it holds its grain on the stalk longer into the winter without shelling and stands above the snow, it is one of the most valuable of upland grains for winter feeding. Grows on poor soil and waste land. Plant 50 lbs. per acre for best results. Especially attractive to ducks when grown near water. Plant in the Spring and enjoy increased and improved shooting the following Fall. This grain attracts pheasants from miles around and **holds** them to insure you the best of sport.

100 lbs. \$12.00; 50 lbs. \$6.00; 35c per lb.

"WILD LIFE" UPLAND GAME FOOD MIXTURE

This is the only complete planting mixture on the market today that provides an abundance of food for **PHEASANTS, QUAIL** and other upland game. Our special seed mixture is composed of only the finest, proven game bird foods and is properly mixed for planting feeding strips and patches with no attention required after planting. It provides a wide assortment of foods for the birds, and is properly balanced to produce winter food as well as early Fall food for the birds. This special mixture should be planted near permanent cover such as brushy fence-rows, corners or clearings surrounded with brush. Mention the location for planting and we'll send the proper mixture of seeds for your planting area. Sow broadcast as per instructions which are sent with every shipment. Only \$7.50 for 25 lb. pkg., that sows 1 acre. \$25.00 per 100 lbs.

*insure
good hunting*

WILD DUCK MILLET (*Echinochloa crus-Galli*)

Another of the finest natural attractions for wild ducks, geese, quail, doves, song birds, for planting in most every section of the country. May be planted on mud flats, around the edges of any water areas or on fields adjacent to your duck ponds, and may be planted on areas left exposed by receding waters; excellent where Fall rains flood planted areas.

A typical growth from our Wild Duck Millet seed, near Chandlerville, Ill. Lower picture shows duck food produced 55 days after planting area pictured at top. Please note size of seed heads.

We recommend a progressive planting from early in the season until about August 10th to insure an abundance of food available from the very beginning of the season. The result will be a stand of the finest food for the ducks that will not only attract the birds in flocks, but will hold them and give you some of the finest sport you have ever had.

Quick growing—it matures in about 60 days.

GRADE A1 Seed, free of any objectionable weed seeds. 100 lbs. (sows 4 acres) \$15; 25 lbs., \$5; smaller lots 25c lb.

VINES, TREES, PLANTS FOR UPLAND GAME and SONG BIRDS; ORNAMENTAL

Produce Fruits, Nuts, Berries, Seeds

Order NOW for EARLY Spring Planting.

Excellent Winter Foods—Natural Cover

WILD GRAPE VINES—Summer Grape, Winter Grape. (Include some of each for food over long season). Excellent food, cover for Quail, Pheasant, Grouse, Prairie Chicken, Wild Turkey, Ducks, Song Birds. VINES: 100, \$15; 25, \$5; 5, \$1.50.

FALSE BITTERSWEET—See page 2.

AMERICAN BITTERSWEET (*Celastrus scandens*). Its bright red-orange berries are favorite food of Quail, Grouse, Song Birds. Ornamental. Winter bouquets. VINES, 100, \$18; 25, \$5; 10, \$3.

VIRGINIA CREEPER (*Ampelopsis*). Cover and food for Pheasants, Grouse, and other Game and Song Birds. Winter food. VINES, 100, \$25; 25, \$7; 5, \$2.00.

AMERICAN BEECHNUT (*Fagus americana*) tree. Ornamental. Seeds excellent food for Squirrels, Wild Turkey, Grouse, Quail. TREES, 1 to 2½ ft. 100, \$15; 25, \$5; 5, \$1.50.

PARTRIDGE BERRY (*Mitchella repens*). Bright red berries very attractive to Ruffed Grouse, Quail, Fox, Raccoon, Song Birds. Grows in moist, sandy, leafmold, acid soil, sun or shade. PLANT SODS, 100, \$20; 10, \$3.00.

ORNAMENTAL WILD FLOWERS of Value to Wildlife.

BLUE WATER IRIS, for moist meadows, waterside, pool border, bog gardens. Pretty blue flowers. Benefit fish, frogs, muskrats, wildfowl, marsh birds. ROOTS, 1000, \$30; 300, \$12; 100, \$6; 10, \$1.50.

YELLOW WATER IRIS, originally from Europe—hardy, pretty yellow flowers. Moist places, waterside, few inches water. ROOTS, 100, \$10; 10, \$2.00.

SWAMP LOOSESTRIFE (*Lythrum*). Attractive spikes pink flowers. For wet, marshy places, watersides. Ducks eat seeds. Muskats use. ROOTS, 100, \$16; 10, \$2.50.

ENGLISH CALL DUCKS—MALLARDS

A very select flock of Wild Ducks, crossed between Wild Gray and Black Mallard—also Wild Gray Mallard Ducks — very high class true-to-type birds. NOW IS THE TIME to place your order, for immediate or later shipment. \$5 each; trio (2 hens, 1 drake) \$12.

We have also a very limited supply of Genuine English Call Ducks, well-marked, true-to-type, at \$8 each; trio (2 hens, 1 drake) \$20. Supply is very limited, so ORDER EARLY.

Wild Life Foods

LEGALITY OF NATURAL DUCK FOODS

Gentlemen:

Not only does the Biological Survey have no intention of recommending any prohibition against the shooting of migratory waterfowl on marshlands that have been artificially planted with natural food plants. On the contrary we are constantly advocating this means of increasing the natural supply of food for our ducks and geese. Growing food plants, whether present as a result of normal distribution or of artificial planting, cannot be considered in the same category as grain or other food deliberately scattered in a shooting area for the purpose of bringing the birds within range of the guns.

Sincerely yours,

IRA N. GABRIELSON,

INSURE GOOD HUNTING AND ARE LEGAL !

NEW YORK

"The Club has instructed me to write for your latest prices on your Wild Rice, Muskgrass and Naias. You will perhaps recall the last lot of plants shipped us which have produced an abundant growth and there are birds working in the marsh at this writing."—A. C. Klinefeldt, N. Y.

CALIFORNIA

"Please reserve more Chufas and Wild Duck Millet seed for us. Our last lot did very well and the ducks worked our ponds thoroughly."

—J. C. Keyes, California

ILLINOIS

"We will need more of your Giant Wild Rice seed and Wild Celery seed. The trial planting made last Fall has produced a wonderful growth."

—C. J. Hogan, Illinois.

OREGON

"Enclosed are a few photographs taken of our duck shooting lake to show you the splendid stand of Wild Rice we have developed from seed obtained from you, and we are greatly gratified with the results. In this connection, permit me to thank you for the interest you have at all times taken in our problems and for the promptness with which your orders were always executed."

—Frank C. Hesse, Oregon
